SUMMARY

Software Engineer with 3+ YOE building production web applications and AI-powered products. Built UI adopted by 10,000+ sellers. Solo-built Rahify, an AI travel planner with 200+ users. Proficient in React, Vue.js, TypeScript, Python, FastAPI, and LLM integration. MS CS, UT Dallas (2026).

EXPERIENCE

QUINBAY (Blibli e-commerce platform), Bengaluru, India: Senior Software Developer February 2024 - May 2024

- Launched Seller Shipping Voucher UI with Vue.js and BLUE DLS, adopted by **10,000+** sellers in 1 month, increasing sales by **20%** through streamlined workflows and responsive design.
- Built a VSCode plugin parsing TypeScript ASTs to auto-generate **Jest test scaffolds**, cutting QA validation time by **73%** (80 to 22 min per cycle).

QUINBAY (Blibli e-commerce platform), Bengaluru, India: Software Developer June 2021 - February 2024

- Led Vue 2 to Vue 3 migration with Vite and Pinia, improving build efficiency by **2-5x** and site performance by **30%**.
- Refactored legacy backend code with TypeScript and Mongoose, reducing development time by **30%**.
- Mentored interns in Agile workflows with Git and Storybook, achieving **100%** conversion to full-time roles through hands-on guidance and code reviews.
- Owned end-to-end feature delivery for 4 product modules, coordinating with product managers and QA across a 15-member cross-functional team.

COVIAM, Bengaluru, India: Software Engineer Intern March 2021 - June 2021

- Designed an onboarding page with React.js, improving Lighthouse performance score by **20%**.
- Wrote **60+ unit tests** using Jest and Vue Testing Library, increasing test coverage from 40% to **65%** across 3 internal tools.

SKILLS

Frontend:	React, Vue, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Zustand, Pinia, Vite, Webpack, Storybook, React Router, RWD
Backend:	Python, FastAPI, Node.js, Express, Mongoose, REST APIs, GraphQL, SSE Streaming, WebSockets
Databases:	Supabase (PostgreSQL), Firebase, MongoDB, MySQL
AI/GenAI:	LLMs (Groq/Llama 3, OpenAI GPT, Claude), Prompt Engineering, LangChain, MCP, RAG, Tool Calling, n8n Workflow Automation
Cloud & Tools:	AWS, Docker, Railway, Netlify, Git, CI/CD, Linux, Figma, Cursor, PostHog, Stripe, Jira, GitHub Actions
Certifications:	Anthropic Academy: Claude 101, Claude API, MCP, Claude Code, Agent Skills

PROJECTS adarshgella.com/projects

Rahify | AI Travel Planner | [GitHub](#) | [Live](#)
Solo-built SaaS, 200+ users in first week. Zero-hallucination itineraries using "Places First" architecture: fetches 80-100 verified places via Google Places API before LLM generates. SSE streaming, OAuth, payments. Tech: React, FastAPI, Supabase, Groq/Llama 3, Tailwind CSS v4, Stripe

InvestIQ | AI Portfolio Manager | [GitHub](#) | [Live](#)
Goldman Sachs/UTD Hackathon, 5th Place. AI-guided investment platform with deterministic portfolio math engine, Kuber AI assistant (Groq streaming + ElevenLabs TTS), Chrome extension for contextual market analysis, and transparent rebalancing with tax/fee receipts. Tech: Next.js 16, TypeScript, Supabase, Groq/Llama 3, Turborepo, Plasmio, Recharts

RoleLens AI | RAG Resume Analyzer | [GitHub](#) | [Live](#)
RAG-powered resume-to-job fit analyzer. Chunks resume by section, embeds locally via sentence-transformers, stores in ChromaDB, retrieves relevant chunks per query, generates structured fit reports (score, skill gaps, radar analysis) via Groq. Re-retrieves on every follow-up. Tech: React, FastAPI, ChromaDB, sentence-transformers, Groq/Llama 3

AdWeather Agent | Agentic AI App with MCP + LangChain | [GitHub](#)
Full-stack agentic app: MCP server wrapping OpenWeatherMap API, LangChain agent with tool calling that makes real-time ad campaign recommendations from live weather data. Built entirely in Cursor. Tech: React, FastAPI, LangChain, MCP, Groq, Docker

LeadFlow | AI-Powered Cold Outreach Automation | [GitHub](#)
Automated B2B lead generation: Hunter.io scraping, Groq/Llama 3 powered personalized email generation, Gmail delivery, Google Sheets status tracking. End-to-end pipeline with zero manual intervention. Tech: n8n, Groq/Llama 3, Hunter.io API, Gmail API, Google Sheets

VSCode Assist | Developer Tooling | [GitHub](#)
VSCode plugin parsing TypeScript ASTs to auto-generate Jest test scaffolds. Adopted as a standard QA tool at Quinbay. Reduced validation time by 73%. Tech: TypeScript, VSCode Extension API, Jest

EDUCATION

The University of Texas at Dallas, Texas (CGPA 3.78/4.0)	USA
Master's, Computer Science Dean's Graduate Scholarship Recipient	August 2024 - May 2026
SRM University AP, India (CGPA 3.56/4.0)	INDIA
Bachelor's, Computer Science Merit Based Tuition Fee Aid, SRMAP	August 2017 - May 2021
